
Minuteman[®]
Excellence Meets Clean

**Not Just Clean,
It's Green!**

Minuteman's new and innovative equipment and cleaners meet or exceed environmental green cleaning standards. Minuteman is proud to offer a product line up that is both environmentally friendly and beneficial to your work environment. Minuteman will continue to protect and conserve the environment through our manufacturing practices and through our ongoing effort toward Green products. We strive to produce machines that promote safety, sustainability, clean indoor air and conserve natural resources.

Not Just Clean, It's Green!

Minuteman is dedicated to Going Green in manufacturing and in our facilities:

- * Waste water produced during manufacturing is strictly tested and processed before being released into sewer systems
- * A state of the art laser cutter reduces metal scrap to 2%
- * A roto-molding machine that runs on natural gas is used in our facility and the advanced design provides gas efficiency
- * Certified vendors are used to recycle spent oil and batteries
- * Plastic scrap from our manufacturing process is sold and recycled locally
- * Packaging materials received in our facilities are returned to the supplier for reuse
- * Much of the packaging materials used by Minuteman is recyclable

Our products have been engineered and designed with Green principles in mind. That's why Minuteman machines are built to be easy-to-use, economic, eco-efficient, environmentally friendly, safe and sustainable. There are many features available on Minuteman equipment that promote Green. Speak with a Minuteman representative to find out which features are included or available for each machine.

Indoor Air Quality

- H.E.P.A. filtration
- U.L.P.A. filtration
- Battery powered or electric equipment
- Dust control with patented PAMS® System

Safety

- One button operation
- Maintenance free gel batteries
- UL listed equipment
- Safety cords
- Low sound level ≤ 70 dB

Sustainability

- Rotationally molded plastic tanks
- Use of powder coating on heavy wear items
- Easy access for service and routine maintenance
- Life-cycle tested equipment

Economic

- Low cost of ownership
- Easy to operate, less training
- Highly efficient equipment
- Aqua-Stop reduces cost of chemical usage while increasing performance

Many more features are included or available on Minuteman equipment, please visit www.minutemanintl.com or call Minuteman at 1-800-323-9420 for more information.

EQUIPPED WITH AQUA-STOP

Minuteman has introduced Aqua-Stop technology to its growing field of Green products and features. Aqua-Stop is specially designed to allow a significant reduction in water and chemical usage while increasing productivity by improving run time per tank, and improving the overall cleaning result.

Test results prove that Minuteman scrubbers equipped with Aqua-Stop use less water and chemical and still clean better when compared to equipment not equipped with Aqua-Stop.

(Testing conducted by
the University of Illinois, Urbana-Champaign)

On average, Aqua-Stop will save Minuteman customers a total of \$31.55 per thousand square feet facility size.

Aqua-Stop provides lower overall costs due to increased productivity and a consistent, high-quality clean. It will help your scrubber reach its optimum cleaning potential.
