

Parts and Instruction Manual TRS17 Total Recovery System

Model TRS17

SPECIFICATIONS:

Model	TRS17-115
Solution Tank	17 gallon
Recovery Tank	15 gallon
Vacuum Motor	Single 3-stage
Pump	600 psi/.85 GPM – 480 psi nozzle
Water Lift	120"
Tank Construction	Polyethylene
Baseplate	¼" aluminum
Rear Wheels	10" non-marking
Casters	4" locking
Power Cord	50 ft.
Dimensions	39"H x 37"L x 22"W
Weight	108 lbs.
Electrical Draw	14.5 amps
Vacuum/Solution Hose	25'
Wand	Swivel wand with squeegee/brush head
Pressure Gun	Included
Fixture Drying Hose	25' x 1.5" Diameter
Warranty	3 year parts 2 years labor, lifetime on body

UNPACKING YOUR NEW TRS17 TOTAL RECOVERY SYSTEM:

When your package is delivered, check the carton carefully for signs of rough handling. If your TRS 17 is damaged, notify the carrier immediately and request an inspection. Be sure to keep the carton, packing inserts, packing lists and carrier's receipt until the inspector has verified your claim.

MINUTEMAN's liability ceases when the carrier picks up the shipment. However, our customer service staff will be happy to furnish any information needed in connection with the claim and will attempt to expedite a resolution.

PLEASE READ BEFORE OPERATING YOUR NEW BURNISHER:

Read the manual carefully and completely before attempting to operate the unit. This manual has important information for the use and safe operation of the machine. Keep this manual handy at all times.

This equipment has been engineered and manufactured to provide excellent performance and service. To ensure that your equipment will continue to perform as intended:

- Maintain equipment regularly- following the suggested maintenance schedule provided.
- Use only original MINUTEMAN parts when servicing.
- Operate equipment with care.

If additional information is needed, please contact:
MINUTEMAN INTERNATIONAL 630- 627-6900

All information and specifications printed in the manual are current at the time of printing; however because of MINUTEMAN's policy of continual product development, we reserve the right to make changes at any time without notice.

FOLLOWING WARNINGS AND INSTRUCTIONS WILL VOID THE WARRANTY.

WARNING!

- The machine was designed for use on hard surfaces, applications as per instructions and recommendations written in this manual. Any deviation from its proper use or purpose and the consequential damage that may occur is the sole responsibility of the end user.
- Disconnect the power cord from the outlet before servicing. Do not leave machine connected to an electrical outlet when unattended.
- Do not immerse or use this machine in standing water. Such use may cause electric shock.
- When using an extension cord, use only a 3-prong conductor grounding cord-12 gauge wire or heavier.
- To avoid electric shock, do not expose the unit to rain or snow. Store it indoors in a heated location only.
- Do not use the machine for dry vacuuming.
- Use defoamer at all times to prevent damage to the vacuum motor.
- Do not use water in excess of 130°F (54°C) in the solution tank
- To prevent seal damage and chemical build-up to the pump system, run clean water through the solution lines after each day's use.
- Use only commercially available carpet cleaning solutions and defoamer intended for use with machines of this type. Do not use dyes, bleaches, ammonia, or other additives.
- The use of powdered cleaning solution, if not diluted properly, may result in damage to the pump. Powdered chemical is not recommended. If powdered chemicals are used, premix in a separate container before placing in the solution tank.
- Always read and understand your chemical's MSDS (Material Safety Data Sheet) before use.
- This equipment is not designed to handle or use combustible/volatile substances such as gasoline or kerosene, in, on, or near the machine. The use of such materials will cause extreme hazardous condition.

- Do not expose machine to freezing temperatures.
- All repairs must be done by an authorized MINUTEMAN repair station.
- Do not use replacement parts other than original MINUTEMAN parts.
- Do not allow your spray stream to remain in one fixed location as surface damage may occur.
- Check that all spray nozzles are securely fastened. Loose nozzles could be ejected from equipment at high speeds.
- Prevent burns by wearing gloves or using a barrier to remove hot quick disconnects.
- This is not a toy. Keep away from children.
- Do not pull by the power or use power cord as a handle. Always unplug by grabbing the plug and pulling, do not unplug by pulling the power cord.
- Inspect cord for damage. Do not use damaged cords. Connect only to properly grounded outlets.
- Keep hair, fingers, loose clothing, and body parts away from moving parts and openings.
- Turn off all controls before disconnecting machine
- Use caution with ejected liquid or chemicals. High pressures and temperatures could be hazardous to nearby people or surroundings.

ELECTRICAL - 115 Volt

Model: TRS-17

This machine is designed to operate on a standard 15 amp, 120 volt, 60 Hz, AC circuit. Voltages below 105 volt AC or above 125 volts AC could cause serious damage to the motor.

GFCI:

WARNING: Do not tamper with or disable the GFCI function.

WARNING: Do not remove the grounding pin from your power cord. Doing so will prevent the GFCI from performing properly and can allow dangerous operating conditions to go undetected. Replace power cords without grounding pins immediately.

GFCI FUNCTION:

For your safety, your TRS-17 is equipped with a built in GFCI (Ground Fault Circuit Interrupter). The GFCI function is automatic and, under normal operating conditions, the GFCI function will not be activated.

A GFCI works by monitoring the amount of current that is flowing from hot to neutral. If the GFCI senses an imbalance in that flow, such as a ground leak, it will disable (interrupt) the electrical system to eliminate dangerous operating conditions. When the electrical system has been disabled, you will not be able to run the TRS-17, at all, until you reset the GFCI.

Before resetting, It is best practice to investigate the cause of a GFCI tripping the circuit.

Possible causes and solutions are:

- Your equipment has become wet and moisture has come in contact with the electrical system. Take unit to an authorized repair location for servicing.
- Your machine is submerged in liquid. If it is safe to do so, remove the equipment and take unit to an authorized repair location for servicing.
- There is damage to the power cord. Replace the power cord immediately with the correct spec cord.
- The wall plug or cord plug may be wet or in contact with water. Using thick rubber gloves, unplug the cord from the wall.
- A leak in your machine's plumbing may be wetting the internal electrical components. Take the unit to an authorized repair location for servicing.
- There is a loose or faulty electrical connection somewhere in your equipment. Take the unit to an authorized repair location for servicing.

To restore function to your equipment when the GFCI has tripped the circuit, press the button on the GFCI marked “RESET”.

If a GFCI continues to trip after resetting, it indicates an unsafe operating condition is present and it is best to take it to an authorized repair location for servicing. Contact MINUTEMAN for assistance in locating an authorized repair location.

GFCI MAINTENANCE:

Although the GFCI function works on its own, it is necessary to test for proper function of your GFCI periodically.

To do this:

1. Plug your equipment to an appropriate wall plug
2. Press the “TEST” button on the GFCI panel
3. Turn on the switches for “PUMP” and “MOTOR” (located on the switch panel on the handle).

If your motors turn on, then the GFCI is NOT working properly- do not use the equipment until this function has been repaired. Take the machine to an authorized repair location.

If neither motor powers on after pressing the “TEST” button then the GFCI is working properly.

Press the “RESET” button on the GFCI and the TRS-17 will be fully functional again.

GROUNDING INSTRUCTIONS:

This piece of equipment must be grounded. Should an electrical malfunction occur, grounding provides a path of least resistance for electrical current- reducing the risk of electric shock. This piece of equipment is furnished with a cord that has a grounding conductor and grounding plug. The grounded plug must only be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

WARNING:

Connecting the equipment to an improperly grounded outlet can result in an increased risk of electric shock. A qualified electrician should be consulted if you are unsure that the outlet is properly grounded. Do not modify the plug provided with the equipment. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This appliance is designed for use on a 120-volt circuit. The grounding plug provided looks like the plug illustrated in Figure 1. Replace the power cord if the grounding pin is damaged or broken.

Extension cords connected to this machine should be 12 gauge, three-wire cords with three-prong plugs and outlets. DO NOT use extension cords more than 25 feet (7.6 m) long

Figure 1

MAINTENANCE:

This TRS-17 has been engineered and built to require minimum maintenance. But like any machine, it does require some care to keep it in optimum working condition. Careful attention to these maintenance instructions will give you maximum operating performance and life expectancy of the machine.

CAUTION: Disconnect the power cord from the outlet before doing any clean up or maintenance on the machine

1. Keep the machine clean. Do not allow dust to accumulate on external surfaces or near any moving parts.
2. After every job, wipe down the surface of the machine with a clean damp cloth.
3. Inspect cord for damage. Do not use machine with a damaged cord.

PERIODIC MAINTENANCE

- Use only chemicals safe for extractors
- Adhere to the appropriate mix ratios for all chemicals
- Do not add chemical to the solution tank- use the chemical feed system or pre-spray
- For optimal performance, it is suggested that the operator flush the system after every job or at the end of the day.
- Pump seals and valves may need to be replaced at the 1000 hour mark if a loss in pressure is noted
- The pressure regulator may require servicing should a pressure drop be noted

Daily:

- Flush chemical lines with water by placing clean water in the solution tank and using the pump to spray.
- Check and clean vacuum filter

Weekly:

- Check for obstructions in vacuum pathways
- Quarterly:
 - Check pump, plumbing and fittings for leaks
 - Check power cords and hoses for tears
 - Check and clean solution filter

CORD STORAGE:

While not in use, storage can be accomplished by winding cord around handle assy. Cord should be completely unwound during operation.

CORD SAFETY

- Do not leave appliance when plugged in. Unplug from outlet when not in use and before servicing
- Do not use with damaged cord or plug. If appliance is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return to service center for inspection and repair.
- Do not pull or carry by cord, use cord as handle, close a door on cord, or pull cord around sharp edges or corners. Do not run this TRS-17 over cord. Keep cord away from heated surfaces.
- Do not unplug by pulling cord. To unplug, grasp the plug, not the cord.
- Do not handle plug or appliance with wet hands.
- This equipment should be stored indoors and not exposed to rain.

1. Handle- Used to maneuver and position the TRS-17. Contains switch box (For switchbox, see #18)
2. Recovery tank lid- Allows access to recovery tank and creates a seal to ensure suction
3. Solution tank lid- Allows access to the solution tank and prevents external contamination of solution tank
4. Accessory racks for hoses, cords, tools etc.- One large rack and one small rack on each side of the machine. 4 total.
5. Wand storage bracket and velcro strap- Allows the operator to secure a wand attachment to the machine for ease of transport
6. Non-marking front 4" locking casters and rear 10" wheels
7. Recovery/vacuum hose inlet barb- connect your recovery vacuum hose to this barb
8. Feed hose line for chemical with threaded bottle cap- secures the feed hose line to the chemical bottle
9. Bottle holder for chemical feed system- Holds up to a one gallon chemical bottle
10. GFCI breaker- Interrupts and disables the electrical system if a ground leak is detected.
11. Chemical dispensing valve- Select between "SOAP" and "RINSE" by turning to left or right as marked
12. Male twist lock pigtail- Connects to 50 ft. cord
13. Exhaust port hose barb- Used to connect to hose with blower attachment.
14. Pressure regulator- Decrease pressure by turning counter-clockwise or increase pressure by turning clockwise
15. Priming/pressure relief valve- Prime system in the event of air lock. Relieves pressure in the event of pressure lock
16. Solution line Q.D.- Pressurized connection for solution line
17. Recovery tank dump valve- Pull up to open
18. Switch box- one switch marked "PUMP" and one switch marked "VACUUM". Switches light up when powered on.

Assembling the accessory racks:

The TRS-17 is shipped with the accessory racks and hardware in the solution tank. When you receive your TRS-17, it is necessary to secure the racks to the body. The only tool required to complete the assembly is a Phillips head screwdriver.

The TRS-17 comes equipped with threaded inserts pre-installed in the body. The two larger racks are installed toward the front of the machine- one per side and the two smaller racks are installed toward the rear, also one per side.

Opening the machine:

This unit can be opened by simply removing two bolts located on the back of the machine. The unit will open forward by lifting up on the handle. If you need to open the unit further, you may release the vacuum hose going from the base of the vacuum plate to the bottom of the recovery tank by loosening the hose clamp.

Installing metering tips for the Chemical feed system:

Remove the semi-clear hose from the bottle cap (#8 on page 7). Select the appropriate metering tip for the dilution required and push it into the tube on the bottle cap.

Metering tip color guide:

Tan	1.25oz/Gal
Turquoise	2.00oz/Gal
Pink	3.00oz/Gal
Brown	4.00oz/Gal
White	5.00oz/Gal

Chemical feed system and hard surface cleaning:

The chemical feed system is designed to deliver accurate chemical dilution for touchless surface cleaning.

To clean hard surfaces:

1. Fill the solution tank of your TRS-17 with sufficient water for the task at hand.
2. Connect solution hose and accessory pressure gun
3. Select the appropriate tip and install on the cap of the chemical feed (#8 on page 7).
4. Place a bottle into bottle holder (#9 on page 7).
5. Take the feed tube attached to the cap (#8 on page 7) and place it inside the bottle.
6. Take the cap from #8 on page 7 and thread it onto the bottle of chemical to secure it in place.
7. Turn the chemical dispensing valve (#11 on page 7) to the left toward the word "SOAP".
8. Chemical will draw in the "HIGH" or "LOW" pressure settings of your pressure gun. To activate the "LOW" pressure setting, pop the collar of the gun out.
9. In either "HIGH" or "LOW" pressure, apply chemical to the walls and fixtures starting from the lowest point to the highest.

10. Spray the floor as you make your way out of the room
11. Allow the chemical to dwell according to the chemical manufacturers recommendations
12. You may use the brush on your squeegee/brush wand to agitate particularly soiled areas
13. When you are ready to rinse away the chemical, simply turn the chemical dispensing valve (#11 on page 7) to the word "RINSE"
14. Set your pressure gun to the desired pressure by pulling the collar in or out. Rinse surfaces starting from the top down
15. See "Recovering liquid" for final steps

Recovering liquid from hard surfaces:

The TRS-17 is equipped with two dedicated tools for liquid recovery: The squeegee/brush wand and the Gulper tool.

1. Connect recovery vacuum hose to the recovery inlet barb (#7 on page 7).
2. Place the vacuum switch (see #18 on page 7) into the "ON" position.
3. Using either the squeegee/brush wand or the Gulper tool, to extract the liquid from the surface. (see page 8).
4. Monitor the levels in the recovery tank and empty as necessary. Use defoamer to ensure your vacuum motor does not take in foam/fluid.

Using the blower feature:

To use, this feature connect the Blower hose (#5 on page 8) to #13 on page 7 and turn on the vacuum motor.

Convenient for:

- Blowing fluid off countertops and walls onto the floor
- Drying faucets and other fixtures
- Blowing off dust

NOTE: Do not leave the blower hose on during normal extraction as it will reduce suction.

Included Accessories

1. Part# 334ACH-2

2 piece wand and reversible brush/squeegee head assembly. For scrubbing on one side and picking up water on the other. Connects to hose #4 on this page.

2. Part# K13686

"Gulper" tool used to extract large volumes of water. Connects to hose #4 on this page.

3. Part# 00604-35HPA

35FT high pressure solution line. Connects to quick disconnect on CR2 (#16 on page 4)

4. Part #00618-4A

35 FT Vacuum Hose. Connects to vacuum hose inlet barb on CR2 (#7 on page 4)

5. Part #00618-5A

6. Part #9000AC-1

High Pressure gun. Connects to hose #3 on this page.

Minuteman International Made Simple Commercial Limited Warranty

REVISION O EFFECTIVE 4/1/2016

Minuteman International, Inc. warrants to the original purchaser/user that the product is free from defects in workmanship and materials under normal use. Minuteman will, at its option, repair or replace without charge, parts that fail under normal use and service when operated and maintained in accordance with the applicable operation and instruction manuals. All warranty claims must be submitted through and approved by factory authorized repair stations.

This warranty does not apply to normal wear, or to items whose life is dependent on their use and care, such as belts, cords, switches, hoses, rubber parts, electrical motor components or adjustments. Parts manufactured by Minuteman are covered by and subject to the warranties and/or guarantees of their manufacturers. Please contact Minuteman for procedures in warranty claims against these manufacturers.

Special warning to purchaser -- Use of replacement filters and/or pre-filters not manufactured by Minuteman or its designated licensees, will void all warranties expressed or implied. A potential health hazard exists without original equipment replacement.

All warranted items become the sole property of Minuteman or its original manufacturer, whichever the case may be.

Minuteman disclaims any implied warranty, including the warranty of merchantability and the warranty of fitness for a particular purpose. Minuteman assumes no responsibility for any special, incidental or consequential damages.

This limited warranty is applicable only in the U.S.A. and Canada, and is extended only to the original user/purchaser of this product. Customers outside the U.S.A. and Canada should contact their local distributor for export warranty policies. Minuteman is not responsible for costs or repairs performed by persons other than those specifically authorized by Minuteman. This warranty does not apply to damage from transportation, alterations by unauthorized persons, misuse or abuse of the equipment, use of non-compatible chemicals, or damage to property, or loss of income due to malfunctions of the product.

If a difficulty develops with this machine, you should contact the dealer from whom it was purchased.

This warranty gives you specific legal rights, and you may have other rights which vary from state to state. Some states do not allow the exclusion or limitation of special, incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above exclusions and limitations may not apply to you.
