Interior or Outdoor Environments

**KS28 Walk-Behind**  
28" Sweep Path Max

**KS32R Rider**  
43.7" Sweep Path Max

## KS28 Walk-Behind Sweeper

The **KS28** Vacuum Sweeper has a high-efficiency dust filter capturing 99.9% of particles at 3 microns, ensuring clean air during and after operation. Its 12V maintenance-free system with an on-board charger is a great option for those looking for a simple, powerful, yet cost-effective cleaning machine.

Adjustable main broom and side brush allows for optimal cleaning adaptation based on floor conditions and various types of debris. The brushes can operate independently, allowing the use of the main broom without the side broom.

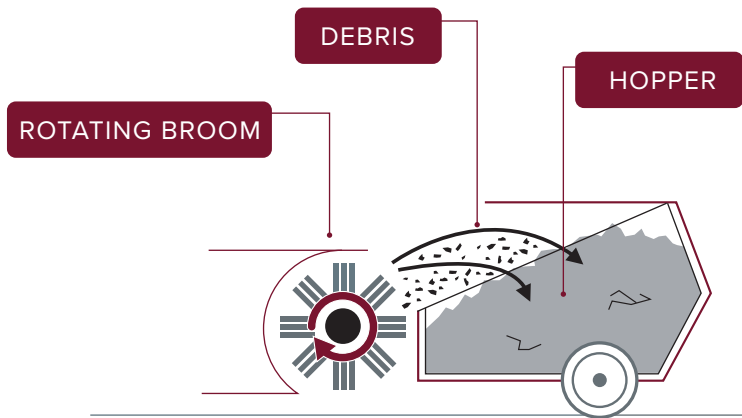

### **Maneuverability**

The compact size and maneuverability of the Minuteman **KS28** make it easy to operate in various environments (indoor and outdoor), including tight spaces, corners and fits through standard doors.

# Overhead Throwing Principal Captures More...Easily

Both the KS28 and KS32R promote uninterrupted work because of their “Overhead Throwing Principal”:

- Rotating brooms throw collected debris upwards and over the brush itself.
- More debris is loaded into a hopper and filled completely and to the top.
- Operators spend less time hand moving debris in the hopper to make more room.
- The location of the hopper makes it easier for operators to see where they are sweeping.

**KS28** In one hour, the single hopper sweeper covers 37,943 sqft of surface, collecting 9.25 gallons of debris.

**KS32R** In one hour, the dual hopper sweeper covers 57,479 sqft of surface, collecting 13.25 gallons of debris.

## KS32R Rider Sweeper

The battery-powered Sweepmaster **KS32R** combines the compact dimensions of a walk-behind vacuum sweeper with the superior comfort and performance of a ride-on machine to provide fast and efficient cleaning of small to medium-sized areas.

A “swivel” type steering column can rotate around the central axis, allowing the operator to turn around easily in tight spaces.

### On-board Charging Station

You can plug the sweeper into any standard electrical outlet (example: a 110V outlet) to charge the sweepers batteries, instead of needing a specialized charging dock or station — a cost savings and convenient feature.

The two batteries are capable of over 2.5 hours of continuous runtime — that’s cleaning over 140,000 square feet on a single charge.

## Specifications

Models	KS28	KS32R
<b>Drive Motor</b>	0.8 HP / 600 W	0.8 HP / 600 W
<b>Brush Motor</b>	0.8 HP / 600 W	0.8 HP / 600 W
<b>Battery System</b>	12v Maintenance Free Battery System/On-Board Charger	24v Maintenance Free Batteries/On-Board Charger
<b>Main Broom Width</b>	20.1"	26"
<b>Single Side Broom</b>	15.8"	35"
<b>Sweeping Broom Width</b>	27.8"	43.7"
<b>Broom Material</b>	Synthetic	Synthetic
<b>Dust Filter</b>	99.9% @ 3 microns	99.9% @ 3 microns
<b>Sweeping Speed</b>	3.1 mph	3.7 mph
<b>Sweeping Performance</b>	37,900 ft <sup>2</sup>	57,479 ft <sup>2</sup>
<b>Hopper Capacity</b>	9.2 Gallons	2 x 6.6 Gallons
<b>Filter &amp; Filter Shaker</b>	Yes	Yes
<b>Weight (Ready to Operate)</b>	269 lbs	620 lbs
<b>L x W x H</b>	47.2 x 27.2 x 28.3"	50.4 x 35.7 x 47.6"

### Key Features:

- User friendly controls
- The robust, heavy duty steel frame construction is high quality
- Quiet operation at 63 decibels or less
- Wet sweep bypass
- Powerful dust control system with easy filter access
- Carpet care kit is standard on all units
- Dirt hopper can be removed and replaced easily

Minuteman is a full line manufacturer of sweepers and scrubbers; as well as critical filter vacuums, industrial and commercial vacuums, floor and carpet machines, and litter vacuums for commercial and institutional facilities, whereas PowerBoss is a full line manufacturer of sweepers and scrubbers for industrial facilities.
